

ZACK WILLIAMS

Asheville, NC | 912-230-0430 | ZackWillDev@gmail.com | github.com/zackattax | linkedin.com/in/zackwilldev

SOFTWARE ENGINEER

Software engineer with experience building full-stack products and AI-assisted development workflows across React Native, TypeScript/NestJS, PostgreSQL, and Starknet. Known for shipping user-facing features, improving architecture, and contributing across frontend, backend, and protocol-integrated systems. Comfortable operating in fast-moving teams, owning ambiguous problems, and using AI generation tools thoughtfully to accelerate practical engineering work.

TECHNICAL SKILLS

Languages/Frameworks: JavaScript, TypeScript, React, React Native, NestJS, Ruby, Rails, Elixir, Phoenix, Cairo

Databases/Tools: PostgreSQL, Prisma, SQL, Git, Cypress, RSpec

AI-Assisted Development: ChatGPT, Codex, prompt-driven prototyping, code review, debugging workflows

Concepts: REST APIs, WebSockets, state management, testing, full-stack development, protocol-integrated systems

TECHNICAL EXPERIENCE

Exploration Software Engineer | StarkWare | Remote

08/2024 - Present

- Built and shipped user-facing features for a React Native application with blockchain-backed state, helping support 322 users within the first two weeks of launch.
- Contributed to Starknet onboarding efforts by writing smart contract functionality that supported an African business integration reaching 230K users.
- Helped build Starknet market-making and trading tooling across frontend, backend, and CLI surfaces, including bot management workflows, analytics, and exchange/protocol integrations.
- Contributed to a modular trading bot architecture using NestJS, PostgreSQL, and Prisma, separating market data ingestion, strategy logic, and execution flows for maintainability and extensibility.
- Integrated or worked with real-time pricing, market data, and exchange/protocol APIs to support automated trading workflows, liquidity analysis, and operational visibility.
- Improved code organization and maintainability by contributing to cleaner state management patterns, reusable abstractions, and more structured application architecture.

Technical Coach (Part-time) | Flatiron School | Remote

2024

- Provided live technical support to incoming students, helping them navigate pre-work, unblock setup issues, and build confidence before day one.
- Guided learners through debugging and foundational programming concepts across web development tools and workflows.

Product Engineer | Statype | Remote

05/2023 - 08/2023

- Resolved a SAML role bug by triaging root causes and adding test coverage, improving reliability in a core authentication flow.
- Built reusable UI components adopted across the application, improving consistency and reducing duplication for the broader engineering team.

Software Engineer | LocalIQ at Gannett | Remote

01/2022 - 01/2023

- Built an A/B test in Elixir that drove 99% of signups through the higher-performing path within the first month of employment.
- Led development of end-to-end testing with Cypress, improving confidence in releases and expanding automated test coverage for critical user flows.
- Contributed to production application development in a revenue-generating organization within a Fortune 500 media company.

Full Stack Developer Intern | City of Wind Design | Remote

09/2021 - 01/2022

- Developed an e-commerce marketplace for designers to showcase case studies and portfolios.
- Built a Ruby on Rails REST API and React/Redux frontend components to support core marketplace functionality.

ADDITIONAL EXPERIENCE

Landscape Crew Leader | BCW Inc. | Atlanta, GA

07/2020 - 01/2021

- Advanced to crew leader within three months based on reliability, communication, and execution.
- Coordinated crew activity and materials to complete landscaping projects efficiently and safely.

Bartender | Marshside Grill, The Pinewood TR, Bread & Butterfly | Brunswick and Atlanta, GA

07/2014 - 03/2020

- Increased monthly recurring revenue growth by 6% in under four months by collaborating on menu changes and improving customer experience.
- Built strong communication, prioritization, and customer-facing problem-solving skills in fast-paced service environments.

EDUCATION

Flatiron School | Full Stack Web Development using Ruby on Rails, JavaScript, and React | Remote | 02/2021 - 07/2021
